DCI SECURITY COMMITTEE

MONTHLY REPORT

November 1977

I. Highlights:

a. (U) Comments received from the NFIB members on DCID 1/16 on computer security were incorporated in a new draft. The DCI approved as a future NFIB agenda item the discussion of this DCID.

b. (U) A proposed DCID setting forth uniform procedures for administrative handling and accountability of sensitive compartmented information (SCI) has been completed and forwarded to the DCI for approval to circulate to NFIB for vote sheet action. One regulation providing uniform administrative procedures for all SCI should greatly enhance security.

c. (S) Three more reports in our National Technical Threat Estimates program have been published and forwarded to NFIB for noting.

25X1

II. Ongoing Activities:

a. (S) The Director of the Interagency Training Center (ITC) reported for FY-77 the attendance of 112 students representing eleven agencies. Since some students attended more than one course, there were 186 course completions. This demonstrates a continued interest and use of these training facilities by the Intelligence Community members.

b. (C) The recommendation that certain audio-countermeasures equipment be added to the U.S. Commodities Control List of the Department of Commerce has been approved by that Department. Designated equipment was placed under the "B" level of U.S. unilateral controls requiring validated licenses for export.

c. (U) A narrative summary of developments in security of interest or concern to the Community was prepared for inclusion in the 1977 DCI Annual Report. Also furnished the security section of the National/Tactical Interface Study which is being prepared for the Congress.

Approved For Release 2005/06/09 : CIA-RDP82M00591R000100090021-0

d. (C) As requested by [REDACTED] DIA Chief of Staff, arrangements have been made to brief the Office of the Deputy Assistant Secretary of Defense for Security Policy on those aspects of the Boyce/Lee case which might impact on the Defense Industrial Security Program.

25X1

e. (U) The Chairman of the DCI Information Handling Committee (IHC) has requested representatives of this Committee to work jointly with the Micrographics Working Group to review the questions of the security of microforms. Because of the 98/1 data compaction possible through the use of standard microfiche, permitting the reduction of about 2 1/2 safe drawers of documents to 1/2 inch of microfiche, a thorough security review is needed.

Approved For Release 2005/06/09 : CIA-RDP82M00591R000100090021-0
